SAFETY GUIDELINES

SUMMER CAMPS 2021

International Summer Camps in Tarifa

We have created these guidelines to communicate the safety measures and procedures, we at **Lenguaventura**, will be taking in order to operate our summer camps in optimal conditions for all campers and staff members - ensuring maximum safety during the camp and offer peace of mind of our student's parents. Following the safety and hygiene protocol from our school residence and from the Junta de Andalusia, we are prepared to organise a summer camp which won't lose its essence of former years but will be safe and fun for all in 2021.

The measures detailed below are focused and will enable us the ideal conditions to carry out our summer camp in the most normal way possible, with the special emphasis on **hygienic-safety precautions**.

We are aware that these measures may be subject to change until July 2021, in accordance with official regulations.

SAFETY CHECKS BEFORE ARRIVAL

For summer 2021 we're counting more than ever on the support of parents to protect our camp community.

- * If necessary, we will kindly ask parents to observe health of their kids for two weeks ahead of the summer camp start date. If possible, we ask parents to ensure the kids have limited contact for the same period of time.
- * Any child who falls ill before arrival to the summer camp will unfortunately not be allowed to participate. In this case a change of date will be granted at no extra cost.
- * According to guidelines and national laws at the time, it may be still compulsory for international arrivals in Spain to present a negative PCR test result no older than 72 hours before arrival in Spain. If this is the case, the campers will be required to do this.

GENERAL SAFETY AND HYGIENE MEASURES INSIDE THE CAMP

- * Our campers will be informed about all safety measures upon arrival. To help the campers remember these safety measures, printed guidelines will be distributed across the camp. There will be always an adult around to advise or answer any questions.
- * Disinfection gel will be exposed at the entrance and all over the residence and the campers will be asked to wash first their hands if coming from outside and also before all meals. We will also take the teenagers' temperatures daily. The same procedure will apply to our staff.
- * Our cleaning staff will follow meticulous cleaning guidelines at the recommended hygiene standards for our camp. The camp base will be disinfected daily including all public areas and sleeping rooms.
- * We recommend that all participants bring flip flops or similar footwear to wear only inside the school residence.
- * Only participants and staff are allowed to enter the camp. Providers will deliver goods/services at another entrance to limit the amount of people within the camp at all times.

SAFETY MEASURES ACTIVITY PROGRAM AND TRANSPORTATION

We're hoping and planning to uphold the summer camp program as usual, but following government guidance we are prepared to change the summer camp format at short notice to ensure a more secluded summer camp program to adhere to guidelines at the time. Our promise is to ensure a fun, adventurous summer camp by always upholding our main activities (kitesurfing, windsurfing and adventure).

- * All summer camp games will be organised to adhere to safety measures.
- * Most of our activities take place outdoors. We are willing to expand even more activities to outdoors if necessary also.
- * Should safety measures still demand social distancing and smaller group gatherings we will adhere to these measures.
- * The contracted transportation we hire is used exclusively by Lenguaventura so there will be no contact with people from outside the Camp.
- * The wearing of masks inside and outside the camp will be subject to national health regulations in July 2021.

PRECAUTIONS MEASURES IN CASE OF NOT FEELING WELL

In the case of a health emergency with a student - such as one of our campers displaying Covid symptoms - we will activate our emergency protocol to reduce the chance of transmission to others. Our facilities will have a special health care area enabled to use if necessary.

- * Any students that feel unwell will receive the appropriate care until they feel better or are healed, as we have done in all former years. If a child feels unwell, it does not necessarily mean that it is Covid.
- * Parents will be informed immediately should their child feel unwell. This procedure has always been followed at the summer camp even in non-Covid times.

By us all working together - **parents, the Lenguaventura team and our campers** - we will be able to achieve a summer of enriching experiences for the teens who visit us in Tarifa.

For a Covid-free summer.
